Admin Panel to manage companies

Basically, a project to manage companies and their employees. Mini-CRM.

- Basic Laravel Auth: ability to log in as administrator
- Use database seeds to create first user with email admin@admin.com and password "password"
- CRUD functionality (Create / Read / Update / Delete) for two menu items: **Companies** and **Employees**.
- Companies DB Collection/table consists of these fields: Name (required), email, logo (minimum 100×100), website
- Employees DB Collection/ table consists of these fields: First name (required), last name (required), Company (foreign key to Companies), email, phone
- Use database migrations to create those schemas above
- Store companies logos in **storage/app/public** folder and make them accessible from public
- Use basic Laravel resource controllers with default methods – index, create, store etc.
- Use Laravel's validation function, using Request classes
- Use Laravel's pagination for showing Companies/Employees list, 10 entries per page
- Use Laravel **make: auth** as default Bootstrap-based design theme, but remove the ability to register
- Make the project multi-language (using **resources/lang** folder)
